

“ We had the pleasure of having Fabio and Luciano from Mimetika Yacht Wrapping assist us on board during a shipyard period. The goal was to get the marble in the guest area protected to prevent future damage and to lift the overall quality and look of the marble tops, tables and bars in these areas. They were extremely helpful and professional, and nothing was too much to ask. From ordering more products for us and getting it to us in a very short period of time, to completing the actual work on board, their time management and quality of work was of top standard. I would highly recommend Mimetika for the wrapping of marble and other similar jobs, and will gladly make use of their services again ”

- Easy Maintenance**
No polishing required! Easy wash with soap and water, that's all what is needed.
- Resistance And Lifetime**
Protect your paint and interior surfaces from wear and tear. UV rays, chemical pollution, hydrocarbon

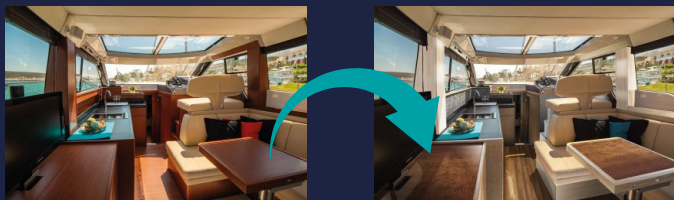

what customers say about us

Dear Fabio and the Team,

We are very glad that we have chosen Mimetika to turn the idea into reality in the highest quality way!
The goal for Fabio and his team was to install the blue film on the hull of the brand new Absolute 60 fly yacht in the design we had chosen.
Fabio is very easy to communicate with, they are very flexible to changes during work. Always in touch.
In the end, it was fast, high quality and very easy for us.
We would highly recommend Mimetika for the quality of materials, workmanship and serious attitude towards work.
Thanks!

Serghei Cavitskii
