Our customer reviews are your best guarantee

“ We had the pleasure of having Fabio and Luciano from Mimetika Yacht Wrapping assist us on board during a shipyard period. The goal was to get the marble in the guest area protected to prevent future damage and to lift the overall quality and look of the marble tops, tables and bars in these areas. They were extremely helpful and professional, and nothing was too much to ask. From ordering more products for us and getting it to us in a very short period of time, to completing the actual work on board, their time management and quality of work was of top standard. I would highly recommend Mimetika for the wrapping of marble and other similar jobs, and will gladly make use of their services again
